Elegant bicycle parking

Commercial stainless steel bicycle racks

At S+Bikes we specialize in design and manufacturing of bicycle stands for residential and commercial use.

We take great care to create products that not only serve their purpose flawlessly, but are also elegant and refined.

With its four-piece selection, StandArt bicycle rack collection brings quality, exquisite design and functionality to the bike parking infrastructure of cities worldwide.

The choices range from the most minimalist and monolithic design of the StrongBar, to the all-rounder ArtRack. In between them, the versatile and practical ArtBar and LowRack provide similar functionality but with a smaller footprint and volume.

All models offer long lifetime and durability guaranteed by the stainless steel construction.

StrongBar

StandArt 2023

This rack is the most basic, yet one of the most sought-after street stand designs, thanks to its minimal presence and simple construction.

The Ø42mm stainless steel tube offers strong support for any bike. Typically two bikes can be leaned on to this rack.

Installation: with dowels and stainless steel bolts or fitted in concrete foundation.

Model	StrongBar
Item code	SB23
Length x Width x Height	57 x 4.2 x 80cm
Weight	4.3Kg
Materials	Stainless Steel AISI-304
Parking spots	2
Wheel rack	No
Frame lock area	Yes
Installation (standard)	2 x 3bolts
Price (excl. VAT)	€185.00

Joints		Footings	
Visible (1) - recommended	Invisible (2)	Standard or custom bolts (1)	Foot in concrete (extra 200mm tube) (2)
-	+ €40.00	-	- €15.00

Item code reference when enquiring or ordering: SB23 + J1/(or J2) + F1(or F2) eg.SB23J1F2

ArtBar

StandArt 2023

ArtBar is the most sleek, to the point, yet elegant product of the line-up. It provides the possibility to tie the bike by the frame and also lean the bike onto it.

It also brings strong support for heavier bikes or other urban micro mobility vehicles and even larger one such as cargo bikes.

Installation: as standard with dowels and stainless steel bolts or fitted in concrete foundation on request.

Model	ArtBar
Item code	AB23
Length x Width x Height	33 x 4.2 x 80 cm
Weight	4.2Kg
Materials	Stainless Steel AISI-304
Parking spots	2
Wheel lock area	No
Frame lock area	Yes
Installation (standard)	2 (or 4) bolts
Price (excl. VAT)	€175.00

Joints		Footings	
Visible (1) - recommended	Invisible (2)	Standard or custom bolts (1)	Foot in concrete (extra 200mm tube) (2)
-	+ €50.00	-	- €10.00

Item code reference when enquiring or ordering: AB23 + J1/(or J2) + F1(or F2) eg.AB23J1F2

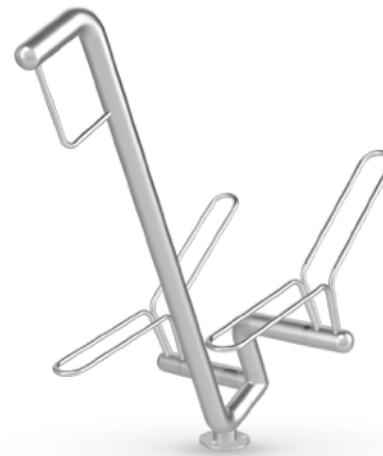

ArtRack

StandArt 2023

This rack offers the most value in something that looks like a sculpture, yet it is practical and solid. It combines both wheel support and the possibility to tie the bike by the frame. All this is achieved in a small footprint.

The Ø42mm stainless steel tube provides the same strong support. The wheel rack is made of 10mm solid bar. Two bikes can be parked on to this rack.

Installation: with dowels and stainless steel bolts or fitted in concrete foundation.

Model	ArtRack
Item code	AR23
Length x Width x Height	90 x 46 x 92 cm
Weight	4.9Kg
Materials	Stainless Steel AISI-304
Parking spots	2
Wheel lock area	Yes
Frame lock area	Yes
Installation (standard)	3 bolts
Price (excl. VAT)	€325.00

Joints		Footings	
Visible (1) - recommended	Invisible (2)	Standard or custom bolts (1)	Foot in concrete (extra 200mm tube) (2)
-	+ €70.00	-	- €10.00

Item code reference when enquiring or ordering: AR23 + J1/(or J2) + F1(or F2) eg.AR23J1F2

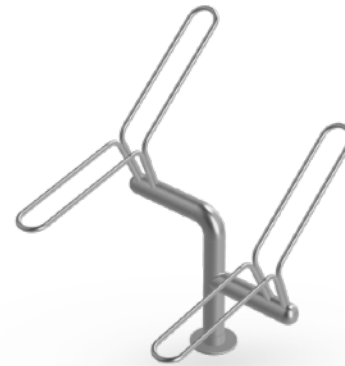

LowRack

StandArt 2023

The LowRack is the smallest in size and footprint. Perfect for private and residential use, or small city office. Multiple arrangements are possible. Can be used complementary to the other racks in the line-up.

The Ø42mm stainless steel tube provides the same strong support. Two bikes can be parked on to this rack.

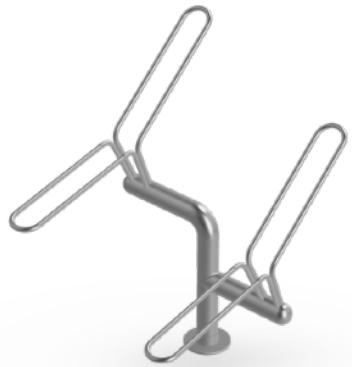

Installation: as standard with dowels and stainless steel bolts or fitted in concrete foundation on request.

Model	LowRack
Item code	LR23
Length x Width x Height	54 x 46 x 57 cm
Weight	4.1Kg
Materials	Stainless Steel AISI-304
Parking spots	2
Wheel lock area	Yes
Frame lock area	No
Installation (standard)	3 bolts
Price (excl. VAT)	€205.00

Joints		Footings	
Visible (1) - recommended	Invisible (2)	Standard or custom bolts (1)	Foot in concrete (extra 200mm tube) (2)
-	+ €45.00	-	- €10.00

Item code reference when enquiring or ordering: LR23 + J1/(or J2) + F1(or F2) eg.LR23J1F2

Commercial bicycle racks

Why the bicycle racks by S+Bikes

The case for S+Street racks

The 4 products in the StandArt range offer unparalleled value thanks to the thoughtful beautiful design and premium materials. Manufactured out of stainless steel which ensures low maintenance and durability.

The clever design and geometry allows users to tie their bike not only by the wheel, but also by the frame which reduces chances of being stolen.

Additionally, because of the level difference between the wheel racks, two bikes can be placed within only 40 cm of each other without the handlebars interfering. This also means you can fit more parking spaces in the perimeter where traditional designs would fit fewer bicycles.

Esthetically, our street racks have a timeless elegant presence and premium feel, which makes them fit perfectly in modern or classic urban environments, both private and public, residential and commercial.

Limitations of traditional bicycle street racks

Typical painted steel racks chip off, rust or deteriorate over time.

Most designs cause damage to bikes around the spokes, fork or frame.

Users cannot tie their bike to the rack via the frame. Locking the bike only by the wheel makes them unsafe to park, prone to theft.

They seem out of place or are simply not used due to the various limitations listed above.
